

EZRAIDER E-CART

EZRaider E Cart HD - An electric cart with its own independent electric motor, battery and controllers.

The E-CART serves as a power multiplier and extends the driving range of the vehicle.

EZRaider E-CART is a unique electric Cart with a 1500 W electric hub motor on each wheel, the E-Cart includes a lithium-ion battery motor controller. The E-Cart control and power cables connect to the EZRaider outlets connectors and include a dedicated wagon tow hitch that designed to use with the EZRAIDER HD2 or EZRaider HD4.

The cart can be used to carry equipment, transport goods, evacuate wounded, and more.

The E-CART can carry loads of up to 250 kg / 551.2 pound.

Non electric Cart - A perfectly fitted cart with a dedicated connection to the vehicle, recommended for EZRaider LW. The Cart can carry loads up to 150 kg.
